1986 CORVETTE ESSENTIAL TOOL PROGRAM AG-03-86-04

J 35890 ABS TESTER APPLICATION: Corvette

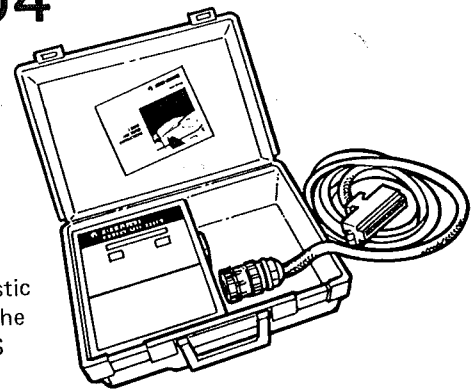

The J 35890 ABS Tester is a microprocessor-based diagnostic tool for the Bosch ABS anti-lock braking system used on the 1986 Corvette. The tester is simply connected to the ABS control module harness and will completely perform the following tests:

- Voltage, continuity, resistance and ground checks of the ABS system
- Static test of lateral acceleration switch, ignition switch, brake light switch and anti-lock light
- Dynamic test of pump, two stage valves and speed sensors

System faults are displayed on the 16-character vacuum fluorescent display by a message indicating which circuit or component to check. Two membrane switches are provided to allow the technician to answer messages, select the test modes and wheels to be tested.

FEATURES:

- Identifies and displays twenty two specific fault messages
- Tester is powered through the Control Module Harness
- Includes 6' harness connector
- Complete comprehensive instructions
