

VACUUM SYSTEM - SCHEMA

- |                                      |                                |
|--------------------------------------|--------------------------------|
| A - Fresh air/recirculating air flap | 1 - Intake line                |
| B - Temperature mixer flap           | 2 - Non-return valve           |
| C - Defroster flap                   | 3 - Test socket                |
| D - Footwell flap                    | 4 - Vacuum tank                |
| E - Bulkhead                         | 5 - To cruise control actuator |
| F - Setting motor                    | 6 - Distribution manifold      |
| H - Heating valve                    |                                |
| V - Evaporator                       |                                |
| W - Heat exchanger                   |                                |
|                                      | a to e - Solenoid valves       |
