Porsche Classic

Radio navigation system

The latest technology in a classic car?

Yes, because it's a Porsche.

The Porsche Classic radio navigation system.

The new Porsche Classic radio navigation system with 3.5-inch TFT LCD touchscreen is a technical masterpiece. Thanks to its vintage design references, it will complement the interior of any classic Porsche vehicle (not available for the 356 models; limited functionality of the cover plate for 911 Models from 1974 to 1981). The system represents state-of-the-art technology, featuring two SD card slots, a Bluetooth® handsfree kit and a combined DVD/CD player. What's more, this slimline radio navigation system has a resolution of 480 x 234 pixels. A USB port means you can playback from other media sources and there are also two video outputs and

three AV inputs, one of which is on the front. A remote control and subwoofer output complete the package. The amplifier delivers 4 x 45 watts and the system comes with an AM/FM RDS radio including automatic station search. You can play CDs, a variety of DVD formats and MP3 files. The four-band equalizer sweeps the sound in Classic, Pop or Rock modes. A dial on the left-hand side controls the volume and a rocker switch (no twisting) on the right-hand side is used to locate your chosen station. The new Porsche Classic radio navigation system will be available from all European Porsche Centres and includes up-to-date maps for Europe.

Price list.

Complete units:
