

PRESS RELEASE | April 25, 2013

## Porsche 997 Turbo Supersport Exhaust

**April 25, 2013 – Ft. Washington, PA |** Fabspeed developed a light-weight T304L stainless steel CNC mandrel bent X-Pipe exhaust system to improve the horsepower and sports car sound from the 3.6L & 3.8L twin turbo engine. Designed to be a direct replacement for the factory muffler, this 2.75"/70mm X-Pipe exhaust system includes 200 cell HJS tri-metallic sport catalytic converters and deluxe quad-outlet tips. For even more power and sound, combine this X-Pipe exhaust system to the equal length Sport Headers.

All 997 Turbo vehicles have four catalytic converters, two on each exhaust bank. The Fabspeed 200 cell tri-metallic Sport Catalytic Converters are emissions compliant and will not set the Check Engine Light. For even more power and sound, install the Catbypass Pipes with the Supersport X-Pipe exhaust. Installation does not require any cutting or welding, and you can swap from the 200 cell Sportcats to the Catbypass pipes with the quick-release V-Band clamps.
