

This car is in excellent condition with 56,000 miles. All upgrades and maintenance performed by Porsche mechanics. This is a fast and aggressive sounding C2. Weight reductions with reputable sport upgrades make this a reliable and fun car to drive. The motor was pulled two years ago to address the common oil leak between the cylinders and the engine case. Many other upgrades were performed while the motor was out of the car. This is one Porsche that does not leak oil on your garage floor. Before investing in these types of upgrades all underbody covers were removed and car was found to be rust and corrosion free. This has been a summer fun car and has not been take out in rain or snow. I have also maintained all records for this car so you know what you are getting.

Upgrades

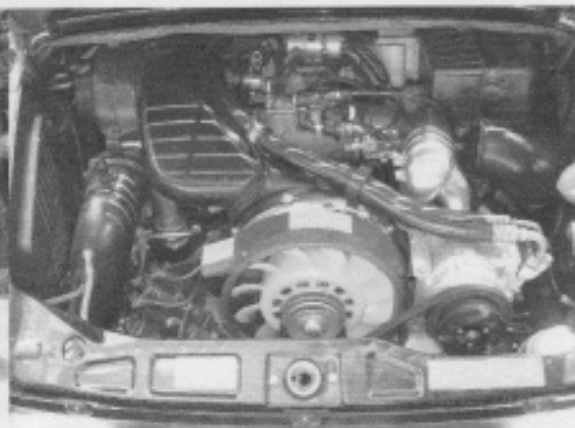

- *17" 1990 turbo wheels.
- *Fabspeed stainless steel sport muffler w/ dual exhaust tips.
- *Fabspeed stainless steel catalytic bypass pipe with oxygen sensor port.
