OWNERS CLUB

STS SPECIAL PROGRAM {As announced on the POC web site}

December 1st, 2007, Porsche Owners Club (POC) is holding a one (1) day Drivers Education (DE) event (No Timing) at Willow Springs International Raceway, providing STS Licensed drivers an opportunity to "test the waters" and experience driving our home track. This is an incredible 9-turn track with some great opportunities to blow out the carbon deposits that have been accumulating in your cars over time. If nothing else, you owe it to your car to attend this special event.

This is a Drivers Education event with no timing: Short Track Series (STS) safety requirements will be in effect. The minimum STS requirement is for drivers to have a Snell Foundation approved SA2000, or later helmet. With STS safety requirements in effect, drivers will be expected to have long sleeved shirts, trousers, socks and comfortable shoes. Additional safety gear such as driver's gloves and shoes are recommended, as well as 5/6 point harnesses, but not required. Some have suggested, you might as well get them prior to the event... addition to the Big Track Time Trial venue is probably inevitable, so just get it over with now. An early Holiday present perhaps?

As part of the program, a POC Instructor will be riding on track with you at all times, providing driving coaching and tips for making the transition from STS to a Time Trial venue. You will hear driving smoothness stressed as well as anticipation, thinking ahead, the driving line and more.

The special Saturday DE session is scheduled for ninety-minutes (90) of track time, divided into four (4) sessions. As mentioned above, there will be no timing provided: this is a true Drivers Education event. At the conclusion of the day, you will enjoy the camaraderie of your friends, some new, some old, at a FREE trackside BBQ dinner provided by your Club.

Participant Eligibility: To participate, you must have earned/be eligible* for a POC Short Track Series License. To obtain a POC STS License, successful completion (Documented with a POC Instructor sign off) of three (3) one (1) day POC STS track days, + a one (1) day POC Driving School, is required. Those lacking from one (1) to two (2) STS track days required for their POC STS License, can pick them up at the November 10/11th POC STS event being held at the Streets of Willow. NOTE: If you have completed the POC STS School and only two (2) driving days, this DE event will count as your third driving day. After successful completion of the DE with a POC instructor sign off, you will be *eligible for your POC STS License.

POSSIBLE EXTENUATING CIRCUMSTANCES: Also, should you feel your driving resume and past experience fulfills the requirements for a STS License, which would allow you to participate in this event, example a PCA Zone 8 Time Trial Permit, you may apply for a waiver to run this event. State your case and forward to the e-mail address below.

For additional information please call Martin Schacht @ 213 610 7416, or e-mail mfschacht@gmail.com at your earliest convenience. Don't miss out on this unique opportunity to experience the Big Track. Total cost for the day, \$150 for current POC members
