

Vehicle Inspection Report

Please Review This Important Information

Your vehicle has **PASSED** its **SAFETY TEST** and **FAILED** its **EMISSIONS TEST**. Here is what you need to do now:

- **Fix emissions defects** within 60 days of your initial inspection. Have your repairer complete and sign the enclosed Emissions Repair Report Form.
- You may use any repair shop or fix the vehicle yourself, but **consider taking your vehicle to a repair shop that employs state-registered repair technicians** who are trained and experienced in performing emissions repairs. Ten nearby shops with registered repairers are listed on page 2. Shops with ratings of four or five stars have the best emissions repair records.
- Have your repaired vehicle re-tested within 60 days of your initial inspection. The first re-test is free at the original inspection station during this period. Give your inspector the Emissions Repair Report Form at the start of your re-test.
- Pass your re-test and get a new inspection sticker. **If your vehicle fails its emissions test again but a state-registered repair technician made the repairs, your vehicle may still qualify for a new sticker.** See "How to Qualify for an Emissions Waiver or Repair Extension" on page 3.
- **If your vehicle does not pass a re-test within 60 days of its initial inspection, RMV may suspend your registration.**

Questions? Visit www.mass.gov/vehiclecheck or call the **Motorist Hotline** at **1-866-941-6277**. The Hotline is staffed from 7 a.m. to 5 p.m. Monday, Wednesday, Friday, and Saturday, and from 7 a.m. to 8 p.m. on Tuesday and Thursday.

Overall Result:	Fail	Vehicle Information		Station Information	
Safety Result	Pass	VIN	WP0AA2995VS321798	Name:	
Emissions Result	Fail	License Plate	52RW92	Address:

OBD System Test - Failure Messages

This vehicle has **FAILED** its **EMISSIONS TEST** due to an inoperable Malfunction Indicator Light (MIL) - the "check engine" light on your dashboard. The light should be repaired and the vehicle re-inspected.

Your vehicle has **FAILED** its **EMISSIONS TEST** due to a problem with the engine or emission control systems found by the On-Board Diagnostic (OBD) system. The problem should be repaired and the vehicle re-inspected. Diagnostic Trouble Codes stored in the OBD system are listed above (if available) to assist in repairing the vehicle.

Be Sure Your Vehicle is Ready for a Re-Test

Once repaired, your vehicle will need to be driven in both city and highway conditions to reset its computer so it will be ready for its emissions re-test. If your vehicle is not ready, it cannot be tested and will be turned away. About one week of combined city and highway driving after repairs is usually enough to reset the vehicle's computer so it will be ready for a re-test. For more information, consult your repair technician, dealer, or manufacturer.

How to Qualify for an Emissions Waiver or Repair Extension

If your vehicle's emissions control system has been repaired but the vehicle still does not pass its re-test, it may be eligible for a waiver of the emissions requirements until its next scheduled emissions test. Your vehicle can receive an inspection sticker if it has no safety defects and:

- **Emissions repairs were performed and documented by a state-registered repair technician.** Work done by other parties does not qualify.
- Repairs cost more than \$750 if your vehicle is five model years old or newer, \$650 if it is six to ten model years old, or \$550 if it is older.

Repairs were appropriate for the diagnostic trouble code(s) that caused the malfunction indicator light to be commanded on by the OBD system.

Other restrictions may apply. For more information about how to apply for a waiver, please visit www.mass.gov/vehiclecheck or call the **Motorist Hotline** at 1-866-941-6277. The Hotline is staffed from 7 a.m. to 5 p.m. Monday, Wednesday, Friday, and Saturday, and from 7 a.m. to 8 p.m. on Tuesday and Thursday.
