

JACKING UP PORSCHE 911

TOOLS: Trolley Jack, Bottle Jack, And 4 Jack Stands

Steps to jack car UP

- 1.) Prepare and position **jack-stands** prior to jacking car up.
- 2.) Use **trolley-jack** to jack up the **REAR** of the car at proper jacking point. *Entire side of the car will raise.*
- 3.) Place first **jack-stand** under the **FRONT** jacking point.
- 4.) Use the **bottle-jack** to support the **REAR** suspension-junction point.
- 5.) Once the **REAR** is supported; remove the **trolley-jack** and replace it with the second **jack-stand**.
- 6.) Remove the **bottle-jack** and **REPEAT** the same process on the other side.

Steps to let car DOWN

Reverse the steps above: Starting with (1) supporting the **REAR** suspension-junction point with the **bottle-jack** and removing the **REAR jack-stand**; (2) inserting the **trolley-jack** to support the car on the **REAR** jacking point; (3) remove the **FRONT jack-stand**; (4) lower the car using the **trolley-jack**.
