## Installing headlights

### Information

When installing the headlight, plastic spring **B** must be fully pressed down and held by locking rod **A**.

If plastic spring **B** is not fully pressed down and held by locking rod **A**:

- ▶ Turn the socket wrench clockwise on the left headlight (in direction of travel) and anti-clockwise on the right headlight; hold if necessary.

1. Insert the headlight into the wing, attach the connector and then push the headlight fully into the wing.

2. Push the headlight towards the rear while turning the socket wrench anti-clockwise to the stop on the left headlight (in direction of travel) and clockwise to the stop on the right headlight, in order to lock the headlight.

You should feel and hear the headlight locking mechanism engage.

3. Check that the headlight is seated securely.
4. Remove the socket wrench and place it in the tool kit.
5. Close engine compartment lid.
