Headlight Adjustment

Adjustment of the headlights should only be performed at a specialist workshop with suitable adjustment equipment.

Adjustments are made with the vehicle ready to drive and the fuel tank completely full.

Changing Headlights From Left to Right-Hand Traffic

If you travel to a country where traffic drives on the other side of the road, the headlights must be repositioned when you cross the border. The dipped beam then lights symmetrically and drivers of oncoming vehicles are not dazzled.

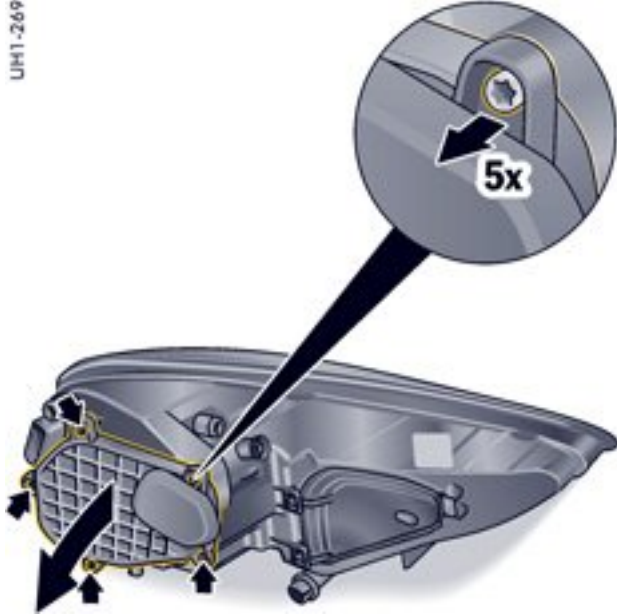

Information

Headlights with dynamic cornering light must be changed on the multi-function display:

- ▶ Please refer to chapter “CONVERTING HEADLIGHTS FOR LEFT/RIGHT-HAND TRAFFIC (PORSCHE DYNAMIC LIGHT SYSTEM)” on page 130 (/2015-cayenne-manual/12/130/Dynamic-high-beam-activating-deactivating-MFD).

The message “**Headlights adapted for LHD/RHD**” appears on the multi-function display whenever the ignition and dipped beam headlights are switched on.

On the return journey, do not forget to readjust the headlights.

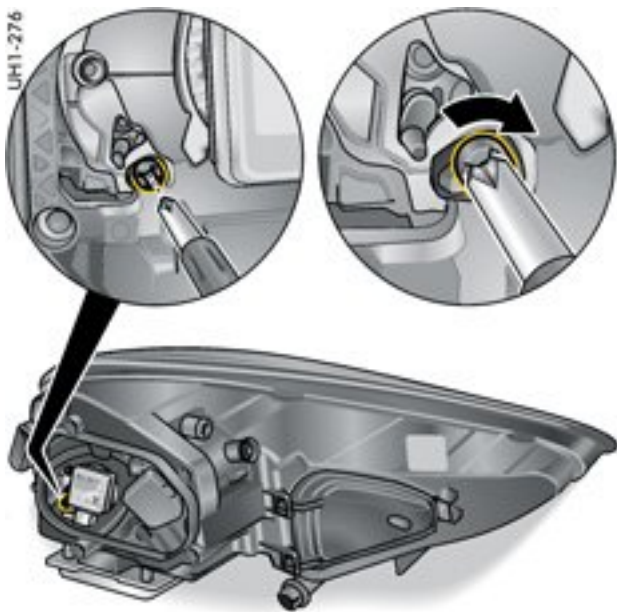

Changing headlights without dynamic cornering light

1. Remove the headlight.

For information on removing headlights:

- ▶ Please refer to chapter "REMOVING HEADLIGHTS" on page 322 (</2015-cayenne-manual/12/322/page>).
2. Press both release tabs down and remove the cover.

3. Turn spindle as far as it will go in clockwise direction using a crosshead screwdriver.
4. Fit cover on headlight.
Both release tabs must be fully engaged.
5. Install the headlight.

For information on installing headlights:

- ▶ Please refer to chapter "INSTALLING HEADLIGHTS" on page 323 (</2015-cayenne-manual/12/323/Auxiliary-high-beam-headlight-Installing-headlights>).

6. Reposition the other headlights.
