

## Michelin PS Cup II Tire Pressures

### ROAD RACING (psi)

Front: 25 cold; 32 hot

Rear: 28 cold; 36 hot

Note: If you're road-racing hot pressures are too high, start with slightly lower cold pressures.

### AUTOCROSS (slalom)

**32–36 psi hot (front/rear)**

Note: Though autocross hot target pressures are the same as those for road racing, you may need to start at a higher cold inflation pressure to compensate for the lower pressure gains in autocross racing.

### ROAD

**OE pressures** (Consult your vehicle Owner's Manual.)

### RAIN

For both autocross and road racing, you may need to **increase tire pressure 6 – 10 psi over cold**, dry pressures. Vehicle and driving style are important factors, so some testing may be necessary
