

ClearGuard Nano™ SR

SELF HEALING

NANO-TECH PAINT PROTECTION FILM

ClearGuard NANO™ Solar Reconvergence (CGN-SR) is the latest technology in clear Paint Protection Film. Constructed with a revolutionary nano-coating that implements advanced self-healing features with exposure to the sun. The uniqueness of CGN-SR is its ability to repair surface scratches with infrared, ultraviolet rays, or heat. Micro-scratches and swirls will dissipate as the film's molecular structure will begin to re-bond to its original state. This regenerative process will self-heal minor surface scratches even in cold climate.

LIQUID GLOSS FACTOR

Another unique feature of ClearGuard NANO™ is our development and implementation of the highest Liquid Gloss Factor in the industry. This is an achievement and measurement of unsurpassed surface brilliance, depth and intense gloss of CGN-SR when applied to any vehicle. The result is the highest reflectivity and transparency of any paint protection film on the market.

FEATURES

1. Solar Reconvergence - self-healing minor scratches or swirls with exposure to the sun.
2. Anti-Etch and Anti-Stain durable coating.
3. Highest Liquid Gloss Factor of any film on the market- unsurpassed depth and brilliance that creates a mirror finish on your vehicle.
4. Clearest film on the market.
5. Durable PET base urethane to protect underlying paint from scratches and rock chips
6. Tested and Approved by the best installation facilities in the world.

UNMATCHED OPTICAL CLARITY and GLOSS

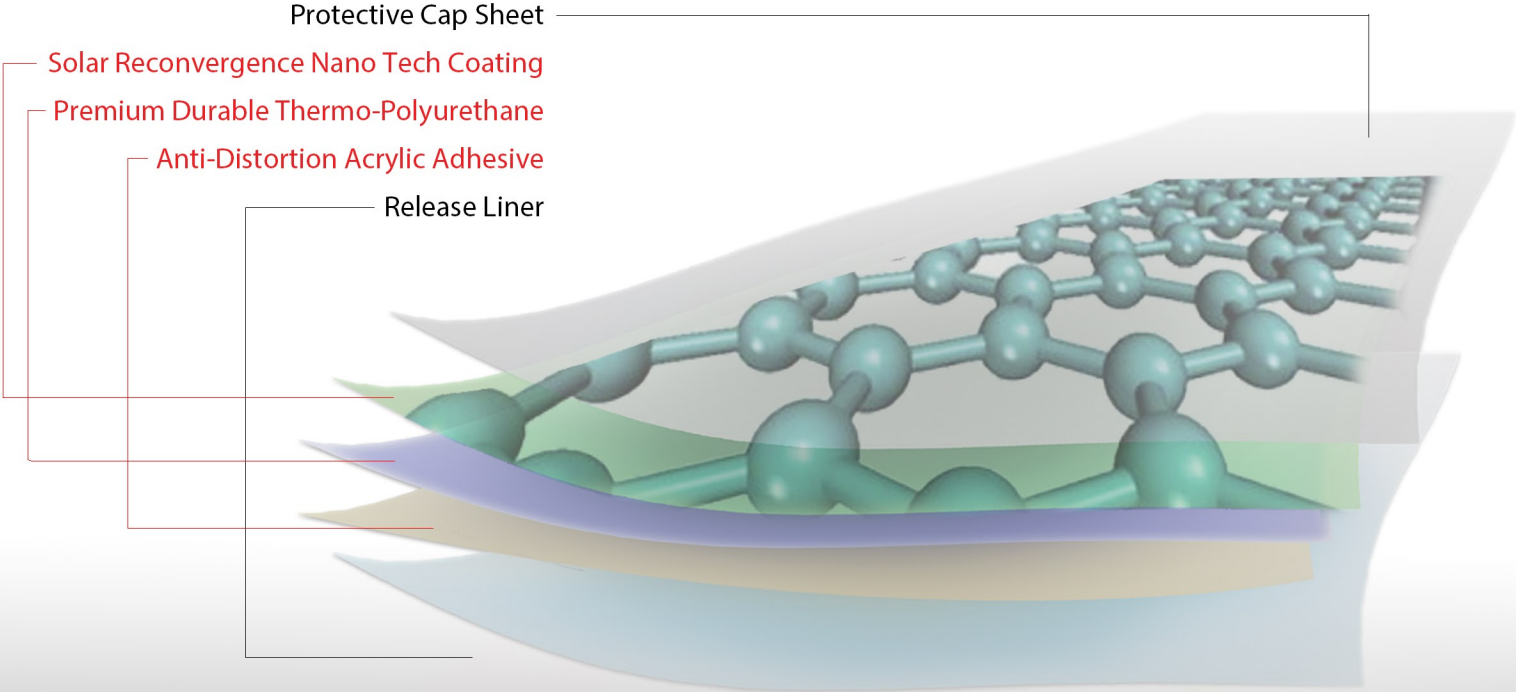

Advanced technology and proprietary nano-coating procedures have allowed Prestige to infuse an upper layer of clear coat into the base PET to significantly improve its durability. Along with its industry leading coating, ClearGuard NANO™ boasts an ultra clear adhesive system, making it the clearest film on the market. As illustrated in the image below, ClearGuard NANO™ has minimal “Orange Peel” texture and its gloss coating is rated 50% glossier compared to the leading brand.

ClearGuard NANO™

General Specifications

Film Thickness	6.0mils
Adhesive Thickness	1.6mils
Top Coat Thickness	0.6mils
Total Thickness	8.2mils

Frequently Asked Questions

What is the warranty for ClearGuard Nano™?

ClearGuard Nano™ comes with a Limited 10 year warranty from fading, cracking, and bubbling due to manufacturer defects. (Does not warrant against daily “wear and tear”)

Will ClearGuard Nano™ diminish the appearance of my vehicle?

Prestige ClearGuard Nano™ has the highest optical clarity of any film on the market today. It will provide your vehicle with the latest in paint protection film technology that is virtually invisible.

Will my vehicle fade evenly under the sun?

ClearGuard Nano™ is UV stable, which allows UV rays to penetrate so that all surfaces fade at the same rate. This eliminates the “2-tone” effect that often resulted from traditional leather bras.

How do I maintain the film?

Part of maintenance is to wash your vehicle regularly and to apply film protectant or sealant. Do not use any abrasives or pressure wash the film along the edges.

Can the film be removed if I decide to sell my car in the future?

ClearGuard Nano™ have been tested to be safe for most OEM paint.
