The new Macan GTS

ProductNews

The new Macan GTS

The new Macan GTS will add another character with a sporty and exclusive nature to the Macan model range. It fills the gap between the Macan S and Turbo. With its individual and GTS-specific design, it embodies the sporty brand values and combines sportiness and day-to-day usability like no other vehicle in its class. The new Macan GTS sets new standards in the compact SUV segment.

Standard Equipment

Highlights

- GTS typical exterior design including SportDesign package and side blades in matte black with “GTS” logo.
- 3.0-liter twin-turbo V6 with 360 hp and 369 lb.-ft. of torque

- o** BOSE® surround sound system
- o** Burmester® High-End Surround Sound System

Infotainment

Porsche Communication Management

The model year sees the introduction of the new generation of Porsche Communication Management (PCM) to the Macan model range. It includes completely new, powerful hardware with a high-resolution 7-inch color touchscreen. It forms the basis for a modern user interface with the multitouch gesture control familiar from smartphones. As well as this, there are proximity sensors for even smarter operation. Using the standard mobile phone preparation, mobile phones that support the Hands-Free Profile (HFP) can be easily connected via Bluetooth®. The basic func-

tions of the mobile phone can be operated via the PCM. As well as the integrated standard CD/DVD drive, the new PCM has an USB interface. An iPod-compatible USB interface can be found in the storage compartment of the center console. Music can also be played via an inserted SD card in two SD interfaces below the touchscreen.

Infotainment – Individual options

The three modules open up new possibilities for the Macan models to interact with the mobile world:

1. The optionally available Connect module takes over the basic functions. The module Apple® CarPlay including “Siri”® voice control and Porsche Car Connect.

2. The navigation module contains improved map displays and can display maps either in two dimensions or with a perspective view thanks to the powerful hardware. 3D displays are also possible in selected areas.
3. The Connect Plus module that is available in combination with the navigation module opens up completely new possibilities for integrating the smartphone into the PCM and the use of online functions (information and navigation systems, wireless Internet access (hotspot) for Wi-Fi devices and LTE telephone module.

Optional

Connect

- Apple® CarPlay, including “Siri”® voice control
- Porsche Car Connect

Connect Plus

- Wireless Internet access, LTE telephone module
- Real-time traffic information
- Google® Earth and Google® Streetview
- Apple® CarPlay, including “Siri”® voice control
- Porsche Connect App
- Porsche Car Connect

Navigation module

- Online navigation with dynamic route calculation
- Free navigation map updates for the first 3 years

- 1 USB connection and Universal audio interface (AUX)
- SiriusXM(TM) satellite radio receiver and HD Radio receiver
- Mobile phone preparation

Sound Package Plus

150-watt total power with integrated amplifier and digital signal processing

Infotainment and connectivity

Sound systems

LED headlights incl. PDLs+

Technology

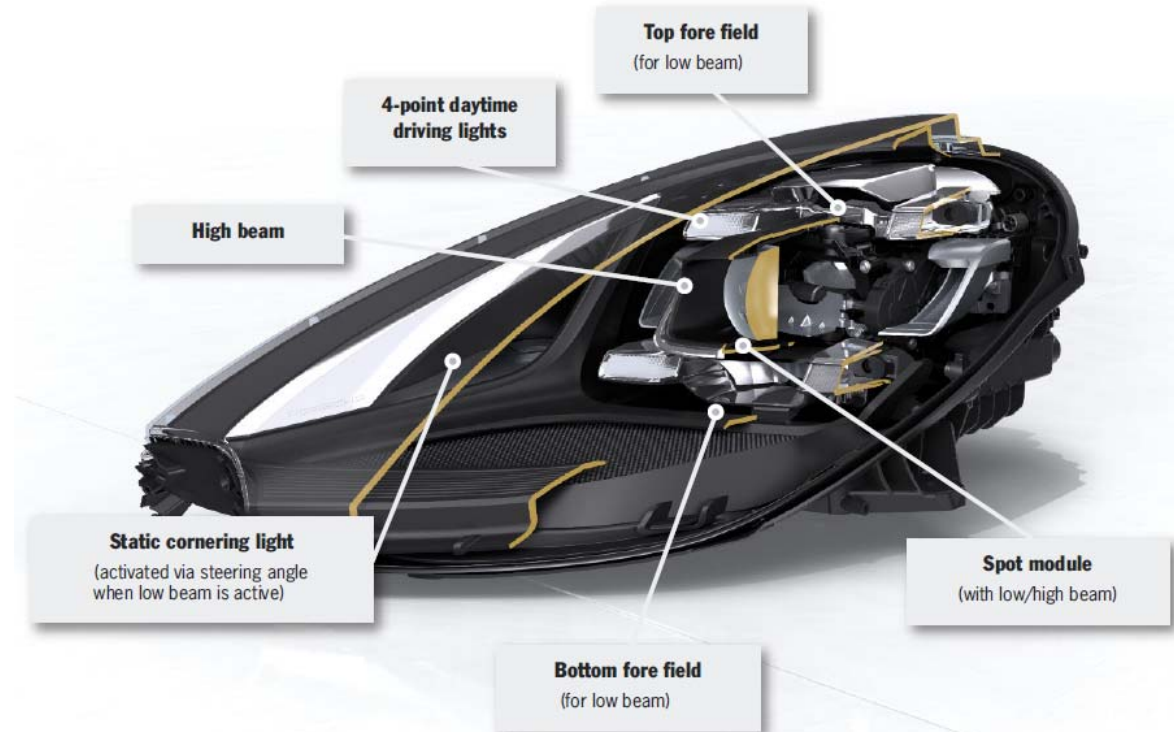

An all-LED-headlight system is offered for the first time for the Macan models. This includes the following:

- Headlights with low/high beam
- Auxiliary LED high beam
- Porsche Dynamic Light System Plus (PDLs+)

In addition to the familiar light functions of PDLs, the term Plus indicates the additional functions “dynamic high beam” The dynamic high beam uses a camera installed in the mirror base or behind the windshield to recognize the light sources of oncoming and preceding vehicles for continuous adjustment of the beam length between low and high beams (including auxiliary high beam). The advantage of this system is the consistent use of the full lighting potential without blinding other drivers.

Design

Visually, the all LED headlights differ markedly from the Bi-Xenon headlights. Instead of a conical light housing with a round projection lens and auxiliary headlights, the all-LED headlights consist of a projection module as a spotlight and additional front modules. The dynamic design of the LED headlights is complemented by an attractive color scheme in the individual headlight components.

4-point DRL

Cornering light

Low Beam

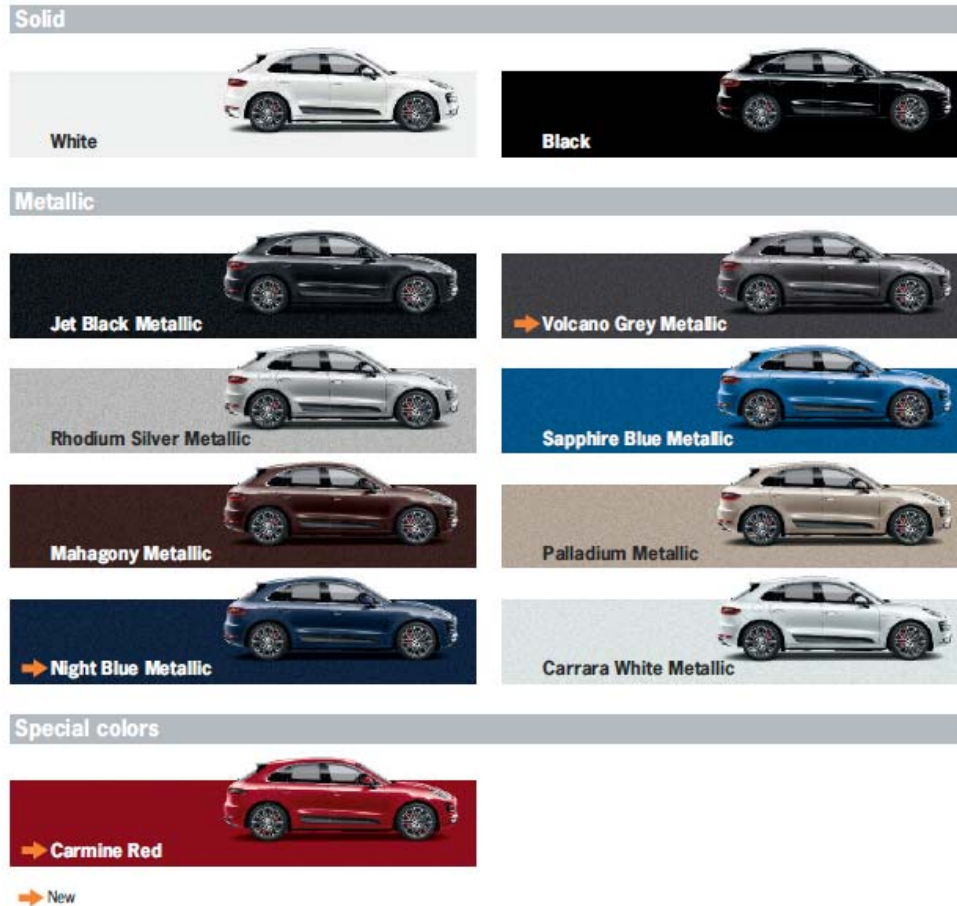

High Beam

Exterior color range

The exterior color range has 4 changes for MY17.

- 1) Volcano Grey Metallic replaces Agate Grey Metallic (new color)
- 2) Night Blue Metallic replaces Dark Blue Metallic (new name)
- 3) Impulse Red Metallic has been discontinued
- 4) Carmine Red is available as an exclusive special color for the Macan GTS
