Important Notes:

Front: Vehicle won't automatically learn sensors, but can be registered following directions in owners manual. No dealership visit required. If TPMS sensors are not installed in the wheels, the TPMS warning lights will stay permanently illuminated. An audible chime may also be heard at start-up.
Reuse OE bolts.

Rear: Vehicle won't automatically learn sensors, but can be registered following directions in owners manual. No dealership visit required. If TPMS sensors are not installed in the wheels, the TPMS warning lights will stay permanently illuminated. An audible chime may also be heard at start-up.
Requires the use of 15mm spacers and longer bolts on rear for proper fitment. Kit available at an extra cost.
