Porsche 911 GT1 Street Version
VIN: WPO ZZZ 99ZVS 396002

We hereby confirm that the above-mentioned vehicle is one of two pre-production prototype road cars based on the Porsche 911 GT1 racing model, as entered in GT races by the Porsche Works Team during the 1996 season.

These prototypes were built for the development and testing of the vehicle prior to the manufacture of a limited series of road cars complying to the then-current European Type Approval requirements. The said limited series was subsequently produced with alterations to the external bodywork to reflect changes made in the meantime to the works racing cars for the 1997 season.

After completion of the development program and manufacture of the limited series of 1997 model customer cars, the two 1996 model prototype cars mentioned above were sold to private collectors.

Yours sincerely,

Dr. Ing. h.c. F. Porsche
