

- SCHROTH interior nets are designed and tested to meet the SFI 37.1 standard
- SFI 37.1 standard dictates replacement of the net every 2 years. Nets are punched with the month and year of manufacture
- 3-strap design allows for maximum support of headrest and seat back
- Ratchet ensures the strap can be tightened properly

Net should be mounted with at least $\frac{3}{4}$ of the triangular section forward of the headrest or shoulder support.
