Contact Peter Krause at peter@peterkrause.net for information about reserving your seat Seminar limited to 25 attendees and Pre-Registration is REQUIRED through MotorsportReg.com

The core principle of all AiM Sports data training is to reveal that data acquisition will allow the user to determine **what** the vehicle is doing, **when** it is doing it and **why** it is doing it while using AiM Sports hardware and software.

This AiM Sports data seminar has been designed to be very interactive with real examples of actual racing data. This seminar is not just a lecture, AiM Sports National Training Manager, Roger Caddell invites questions and comments from attendees and has found that group discussion of the examples helps everybody understand the information more fully.

**LearnFast™ Data Seminar
Practical Automotive Agenda**

- What is Data Acquisition
- Why Use Data Acquisition
- How to Use Data Acquisition
- Data Hardware and Installation
- Introducing the Race Studio Software
- Practical Data Analysis
- SmartyCam HD Video

AiM Sports is the world leader in motor sports and race data acquisition technology, electronics, instrumentation, data loggers, digital displays, lap timers, stopwatches and gauges for performance and race vehicles including cars, motorcycles, karts, and junior dragsters. Many AiM products combine the functions of traditional tachometer, speedometer, temperature gauge, pressure gauge and lap timer all into one compact, high performance unit.

Roger Caddell, AiM Sports National Training Manager is a certified trainer with over 31 years of training experience and 39 years of motorsports experience as a driver, mechanic, engineer, and car owner.
