Dear Mr. Dol,

We wish to inform you that due to the introduction of the Cayenne Diesel we revised our existing approval system and established two different Porsche engine oil categories:

**Porsche A40** : This category is equivalent to the current Porsche standard. Oils fitting this specification are valid for all PORSCHE cars as of model year 1994, except Cayenne V6 for longdrain and Cayenne Diesel. Engine oils currently approved at Porsche will be listed as Porsche A40 without need for a new approval request or any other action from your side. The approval process for future candidate oils is still unchanged (Porsche engine test, filled request form and one litre oil sample).

**Porsche C30** : This category is equivalent to the VW claim 504 00 / 507 00 and is appropriate for the use in PORSCHE Cayenne V6 (except for Chinese market) and Cayenne Diesel. For an approval according to Porsche C30 a valid VW claim 504 00 / 507 00, the filled request form and one litre oil sample are requested. Approved oils will be listed under Porsche C30 in our technical information.

**Current overview vehicles / oil categories**

	Porsche A40	Porsche C30
Sports cars, Panamera S / Turbo, Cayenne S / Turbo / GTS	0W-40, 5W-40, 5W-50	- not allowed -
Cayenne (V6)	0/5W-40 - not for longdrain -	5W-30 - not for China -
Cayenne Diesel	- not allowed -	5W-30

This new standard should be reflected in your (or your customer's) product labelling within a reasonable time period. If you have any questions, please do not hesitate to contact us.

Yours sincerely,

Dr. Ing. h.c. F. Porsche Aktiengesellschaft  
Advanced Engineering Powertrain Dept.
