Score

Owner Count :	5
Age :	23
Score :	73
Score Range :	36-62
Positive Factor :	Lease history
Negative Factor :	Calculated number of owners

AutoCheck vehicle history reports include the AutoCheck Score, a tool that enables you to quickly and easily understand a vehicle's past, compare it to other vehicles, and lower the risk of buying vehicles with undetected problems. Your vehicle's history can have an effect on your vehicle's AutoCheck Score. The Score is rated on a scale of 1 to 100, where a higher score equals less risk. Think of the AutoCheck Score as a rating summarizing the longer list of report data. It's also important to remember to look at a vehicle's score in conjunction with the Score Range. An AutoCheck score higher than the score range means that the car is a lower risk compared to other similar cars of the same make and model, while a score lower than the score range means the car is a higher risk compared to other similar cars of the same make and model.
